

Resume of TIMOTHY K. LAWLER

Mr. Lawler joined Intelligent Directions Consulting, LLC, in September of 2008. He has over Thirty years of Information Technology management and consulting experience. His management consulting experience covers several public and private sector business areas, where he has provided expertise in strategic planning, project management, project monitoring, budgeting, cost/benefit analysis, procurement, system requirements analysis, business workflow analysis, business process re-engineering, data modeling, software package and system selection, and system implementations.

For public sector clients he has managed statewide software rollouts to all counties, cities and townships throughout the state of Arizona and for the county of Los Angeles, California. He has served clients in both centralized and distributed client server environments.

LAW & JUSTICE ENGAGEMENTS

- For Municipal Court of Los Angeles, Superior Court of California, County of Los Angeles managed the Systems and Programming staffs for mainframes, midrange and image processing servers and participated in establishing standards for hardware & software for all courts in the county. Developed and managed Case Management System applications for all Case type including; Criminal, Traffic, Civil, Small Claims, Probate, Mental Health and case arbitration assignments.
- For state of Arizona and all counties in Arizona facilitated in the implementation of Photo Red Light cameras and handheld ticket devices to facilitate automatic update of the statewide court case management system for over 1500 users.
- Assisted in the implementation of electronic imaged documents at various county Superior Courts throughout the state of Arizona.
- Participated in the design and implementation of the criminal delay reduction system for criminal cases in Los Angeles County, to reduce jail over crowding.
- Participated in the design, development and implemented a Civil Case Management System to process forcible detainer cases for Los Angeles Municipal Court.
- Managed, designed, developed and implemented a kiosk to provide traffic services and the ability to pay traffic fines 24-hours a day outside the courthouse.

- As a Project Leader for a major fixed price contract defined requirements and developed a general system design for an integrated property tax system for Los Angeles County (CA) Assessors office. This fixed price contract included system components for the county assessor, tax collector, auditor controller and county recorder. This new system design replaced several existing systems. Various phased approaches to implementation had to be developed which included temporary interfaces, phased data conversions and extensive detailed test plans.

PRIVATE SECTOR ENGAGEMENTS

- As a Lead developer for major consulting firm, developed a Worldwide Trademark Tracking and Renewal system to track and renew trademarks worldwide. The system kept track trademarks in five languages in 165 countries.
- Participated in the redesign of a major aerospace Human Resources System and designed reports to track total covered employees each month by healthcare providers.
- As a Project Leader designed financial processing and alarms processing for a major credit card. Was responsible for the design and implementation of all financial processing and postings for this major credit card company.
- As a Technical Director for an IT consulting company of a fortune 500 company, managed major financial clients, Aerospace clients and credit card systems in Los Angeles.
- As a Senior Analyst developed systems to track Railcar repair costs, financing, railcar contract leases and railcar lease financial modeling for over 50,000 railcars.
- As an EDP Auditor for a major worldwide accounting firm developed comprehensive audit plans, wrote computer programs and conducted EDP audits of financial and manufacturing systems for fortune five hundred companies in the Midwest.
